PROJECTS

1. Academic Aisle

Academic Aisle, an e-commerce platform which is catered to educational purpose. Created a user-friendly dual interface system that lets customers browse a wide variety of goods with ease and allows sellers to manage their educational products with ease. Developed administrative tools that enable administrator to manage vendor operations and platform functionality as whole. Thus, creating a vibrant and user-friendly environment.

2. Amazon Clone (UI)

An Amazon website clone created using HTML, CSS, and JavaScript. Designed a static user interface that replicates the look and feel of Amazon's homepage. Developed key UI components including the header, product grid, and footer. Ensured visual accuracy and layout consistency. This project is a UI clone only, focusing on the design and structure.

Project Repository: https://github.com/73629somesh/Amazon_Clone_UI

3. Personal Portfolio

A personal portfolio website created using HTML, CSS and JavaScript. Designed to showcase my skills and projects in a user-friendly and visually appealing manner. Features sections for professional background, projects, and contact information. Developed with a focus on easy navigation to provide an optimal viewing experience. The website is fully responsive, ensuring it looks great and functions well on multiple devices.
